SKILLS

- Full Stack Web Application Development
- Agile Project Management (Scrum)
- Problem Solving
- Teamwork
- Communication
- Analytical Thinking
- Time Management and Organization

TECHNICAL SKILLS

Web Development

- HTML5, CSS3, JavaScript (ES6), TypeScript
- React.js, Next.js
- Node.js, Express.js
- PHP, Laravel
- Python, Flask
- REST API Development
- R

Databases

- MySQL, PostgreSQL, MongoDB
- SQL, PL/SQL
- Database Design and Modeling
- Database Normalization
- UML, Merise

Data Analytics & Business Intelligence

- Data Analysis, Cleaning, and Preparation
- Data Visualization
- Advanced Excel
- Power BI

Dashboard Development

- KPI Definition and Monitoring
- Business Reporting
- Business Intelligence (BI)
- Data Warehousing
- ETL Processes
- Descriptive & Inferential Statistics
- Survey and Sampling
- Optimization and Parametric Estimation
- Quantum Computing

Artificial Intelligence

- Machine Learning
- Deep Learning

LANGUES

- Arabic: Native
- English: Intermediate
- French: Intermediate

PROFILE

Recent graduate with a Bachelor's degree in Data Analytics and Decision Support Systems and a Specialized Technician Diploma in Digital Development – Full Stack Web Development. Passionate about web development, data analysis, and artificial intelligence, I am eager to apply my technical skills and analytical mindset to innovative projects. Rigorous, autonomous, and highly motivated, I am ready to contribute effectively to the development of high-value solutions while continuously expanding my professional skills.

EDUCATION

Baccalaureate in Physical Sciences - French Track 2022 - 2023

Specialized Technician Diploma in Digital Development

Full Stack Web Development
Office of Vocational Training and Employment Promotion (OFPPT), Meknès 2023 - 2025

Bachelor's Degree / DUT - Data Analytics and Business Intelligence

2025 - 2026

École des Sciences et Techniques d'Oujda (ESTO)

PROFESSIONAL EXPERIENCE

DATA ANALYTICS PROJECTS

- Fraud Detection Using Machine Learning** — Developed a machine learning solution for automatically detecting fraudulent transactions using classification models after analyzing and preprocessing financial data.
- Customer Churn Prediction** — Developed a predictive model to identify customers at risk of leaving a service and support customer retention strategies.
- Credit Risk Prediction App** — Developed a Streamlit application for credit risk assessment using feature engineering and machine learning algorithms.
- Analyse Exploratoire - Titanic Dataset** — Performed statistical analysis and data visualization to identify factors influencing passenger survival.
- Analyse Exploratoire - Iris Dataset** — Analyzed and visualized flower characteristics to understand feature distributions and class separation.

EXPÉRIENCE PROFESSIONNELLE

Crédit Agricole du Maroc - Meknès Headquarters | Data Intern (3 months)

ChequeGuard - Intelligent Cheque Verification Platform

- Developed an intelligent platform for automated cheque verification.
- Implemented automatic signature detection using YOLOv8.
- Extracted cheque information using OCR technology.
- Developed backend APIs using Python.

Web Development Intern - BHA Business Haus Académie (1 month)

- Developed the front-end of an online training management platform using Next.js and TypeScript.

Final Year Project - Interview AI

Automated Video Interview Platform

- Developed an asynchronous video interview application.
- Implemented automatic speech transcription using Whisper.
- Integrated AI-powered analysis of candidate responses using the Grok API.
- Developed the application using React.js, Tailwind CSS, Flask, and MongoDB.

PARTICIPANT - UPF CODING CHALLENGE (FÈS)

- Participated in a programming challenge organized by the Private University of Fez (UPF).
